

# MOTORCYCLE

## CIRCULATOR PAD

MODEL# CIRC0917

### WITH BREATHABLE MESH

The Circulator Pad uses natural air circulation to keep you cool and dry. Seats can reach temperatures of 150° after sitting in the hot sun or on a long ride. The Circulator Pad with “see through” construction lets cool air circulate for super ventilation, to keep you dry and comfortable. All materials in the circulator pad are 100% non-water absorbing. If the pad gets wet, just shake and ride. The pad has a non-skid bottom and a built-in elastic strap that slides under the seat. It is stain resistant and requires no maintenance.

### Specifications

- Weight: 6 oz.
- Dimensions: 14”W x 17”L x ½”H

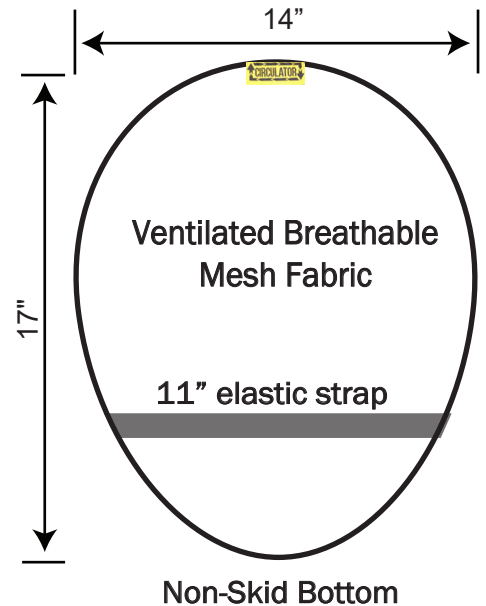

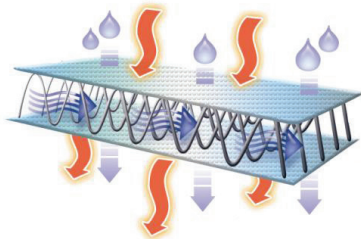

### Benefits and features

- No hot seat from sitting in the hot sun or from a long ride
- “See Through” ventilation for a cool ride
- “See Through” construction allows for unrestricted air flow
- Non-water absorbing fabric - just shake and ride
- Lightweight and easy to store
- Non-skid bottom
- Stain resistant
- No maintenance
- Easy elastic attachment

### AIR-FLO Breathable Mesh

This fabric has a unique three-dimensional, internal structure that allows it to breathe and control moisture. It's durable and lightweight
